iPurpose: what exists today and what the pilot would build

The core platform is live. The pilot localizes the opportunity layer and adds structured follow-through.

Area	Exists today	Pilot adaptation
Clarity	Live assessment with personalized results	Ghana context refinements if needed
Purpose	Live Purpose experience with a saved profile	Ghana-relevant examples if needed
Compass	Live, persistent AI-guided decision support	Ghana context and pilot-specific guidance
Next steps	Suggested next steps already generated	Structured decision and action follow-up
Opportunity	General decision and navigation support	Curated, verified Ghana pathway library
Measurement	Journey, completion, Compass and engagement data	Baseline and closeout measures, pathway clicks, reported actions
Counselling boundary	AI guidance is not human counselling	UG counsellors remain central; referral and escalation process
